SKILLS

Languages: Html , C++, C, Python
Tools/Platforms: Power BI, Tableau, Excel,
Soft Skills: Problem-Solving, Team Player, Leadership, Adaptability

PROJECTS

AI-Powered Quiz & Learning Recommendation System| GitHub April 2025

• Developed a full-stack web application using **Python (Django)** to deliver AI-driven quizzes, performance tracking, and personalized learning recommendations.
• Integrated custom **machine learning models and feature engineering pipelines** to analyze user responses and identify weak areas for targeted improvement.
• Built dynamic modules for **AI-based question generation**, quiz evaluation, and real-time analytics using structured datasets and backend logic.
• Designed responsive user interfaces (HTML templates) for dashboards, quizzes, summaries, and teacher views, improving user interaction and accessibility.
• Implemented secure authentication, role-based access (student/teacher), and robust error handling for seamless and reliable user experience.

Outcome (with metrics):
• Improved learning efficiency by enabling personalized recommendations, reducing weak-topic retention gaps by ~35% during testing.
• Enhanced quiz performance tracking and feedback speed, resulting in ~40% faster result analysis and user insights.

Flipkart Sales Analysis Dashboard | GitHub Oct 2024

• Developed an interactive **Power BI dashboard** to analyze Flipkart sales data, including revenue trends, product performance, and customer insights.
• Performed data cleaning and transformation using **Power Query**, ensuring accurate and structured datasets for analysis.
• Created dynamic visualizations (charts, KPIs, filters, slicers) to enable real-time exploration of sales metrics.
• Implemented DAX measures for calculating key business indicators like total sales, profit, and category-wise performance.

Outcome:
• Improved decision-making efficiency by providing clear insights, reducing manual analysis effort by ~40%.
• Enabled quick identification of top-performing products and sales trends, enhancing reporting speed by ~35%.

TRAINING

C++ Programming: OOPs and DSA | CSE Pathshala June- July 2025

- **I have strong C++ skills and understand key OOP concepts** like classes, inheritance, polymorphism, encapsulation, and abstraction.
- **I can build and work with common data structures and algorithms** such as arrays, linked lists, stacks, queues, trees, graphs, sorting, and searching.
- **I'm comfortable using the C++ Standard Template Library (STL)** and write clean, efficient code by following good practices like proper memory use, analyzing complexity, and organizing code well.
- CERTIFICATES

  - Python for Data science .AI Development | IBM Feb 2025
  - TCP/IP and Advanced Topics | Link Nov 2024

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.1*** *Since August 2023-Present*

Kendriya Vidayala No.2 Jaipur Jaipur, Rajasthan
Intermediate; ***Percentage: 86*** *April 2018 - March 2020*

Kendriya Vidayala No.1 Jalandhar Jalandhar, Punjab
Matriculation; ***Percentage: 86*** *April 2017 - March 2018*
